

Proactively help patients and communities by providing resources to pharmacists to educate about opioid misuse and accidental overdose

Guidance for Pharmacy Partners Outside of North Dakota

ONE Rx was created in 2018 by faculty from the North Dakota State University School of Pharmacy to utilize community pharmacists in addressing the opioid epidemic.

The ONE Rx team welcomes stakeholders and concerned partners from around the country to work together to apply the skills and the location of community pharmacies to help reduce the stigma of opioid use disorders, and provide the best possible patient education and support to patients receiving opioid prescriptions.

Can pharmacists who are not licensed in North Dakota take the ONE Rx training for credit?

Yes, any licensed pharmacist can take the ONE Rx training for credit.

Are the ONE Rx resources on the ONE Rx web page available for use by pharmacists not in North Dakota?

Yes, the ONE Rx materials posted on the ONE Rx web page are free and available for use by others. However, ONE Rx and all ONE Rx resources are the intellectual property of ©ONE Rx, and they must be used in keeping with the approach and philosophy advocated by the ONE Rx training. Any desire to modify any of the materials or use them in any other way requires the consent of the ONE Rx team coordinator Dr. Mark A. Strand, PhD, mark.strand@ndsu.edu

Can pharmacies who are not located in North Dakota implement ONE Rx in their pharmacy?

Yes, however this requires contacting the pharmacy implementation coordinator for ONE Rx, Dr. Elizabeth Skoy: Elizabeth.Skoy@ndsu.edu This is for the purpose of quality assurance and technical support.

Who owns ONE Rx?

ONE Rx is owned by the ONE Rx team, located at North Dakota State University. ONE Rx is funded by the North Dakota Department of Human Services and is designed for implementation in accordance with ND pharmacy law.
