

**Proactively help patients and communities by providing resources to pharmacists to educate about opioid misuse and accidental overdose**

**Exemplary ONE Rx Pharmacy Recognition Program**

ONE Rx is an innovation designed and implemented in North Dakota with potential for impacting thousands of patients in North Dakota and across the country. Pharmacies implementing ONE Rx have agreed to provide screening for opioid use disorder risk and for accidental overdose risk, and providing evidence-based care for all patients receiving opioid prescriptions.

In order to recognize the work of North Dakota pharmacies implementing ONE Rx and to identify exemplary pharmacies devoted to providing the best possible care for all patients receiving opioids, implementing pharmacies will be recognized as follows. Pharmacies will move through the levels sequentially.
